Tyreece Hensley

Rehearsal Observations

- Rehearsal started with the dancers gathered around Akash and discussing pictures that were placed on the ground.
- Akash spoke of texture and feeling. From my understanding it seemed as if he was instructing them to choreograph something based on an image.
- After speaking with Akash the dancers broke off into 3 small groups and began practicing separate sequences.
- The first group consisted of Evrim and Toner. They were practicing a sequence of ~~moves~~ moves that consisted of them marching closely to one another as if they were joint. They would march around the stage like this and do turns but remained stuck to one another.
- The next group consisted of Gizem, Melissa and Beil. They were practicing a sequence that had them moving in a circle. The circular motion was performed by Melissa and Gizem with Beil help them to stay moving.

The movement was somewhat similar to this drawing

- Lastly, Sen and Yasin decided to practice together however they spent most of their time further discussing with Akash. Their dance was very fluid.
